**25 Years**  
of Solar Panel  
**Warranty**

### Rooftop

Solar system mounted on a rooftop of a building or an industrial shed varies according to respective availability of space, the amount of electricity consumed, future electricity needs and the willingness of the owner to invest capital required for the site. Majorly, it comprises of 2 categories:

- (A) Upto 50% of the Contract Load**
- (B) Above 50% of the Contract Load (For MSME Manufacturing Unit)**

Rooftop

### Ground - Mounted

Rocket Solar offers the ultimate EPC solution for ground mounted solar system. Majorly, it comprises of 3 categories:

#### **(A) For Captive Use**

Industrial units without accessible roof can opt for ground mounted solar system for the capacity of 50% contract load or above for their captive use. These projects are subject to levy of various charges namely, transmission & wheeling charge, electricity duty, additional surcharge, etc.

#### **(B) For Sale To 3<sup>rd</sup> Party**

Investors who are looking for lucrative opportunities in power sector can go for ground mounted solar systems & sell the generated electricity directly to industrial or commercial units under ABT Metering.

#### **(C) For Sale To DISCOMs**

Investors looking for secure & long term investment can prefer this type of model. Here, the units generated from solar system are directly purchased by government DISCOMs. These projects come with 25 years of contract life.

Ground - Mounted

**Note: Rates and norms are subject to government policies.**
